

Damp Cure™ Damp proofing Cream

Description

Damp Cure is a unique silicone emulsion damp proofing cream for injection into mortar bed joints to form a chemical DPC.

Installed via a series of 12mm holes that are drilled into the mortar to a depth of 90% of the wall thickness, the cream is dispensed to fill the hole to within 1cm of the wall surface.

Curing starts immediately with the final cure taking 2 – 6 weeks depending on wall thickness.

- Modern rising damp treatment
- Proven silicone technology
- Economic consumption rates

Benefits

Damp Cure injection cream is solvent free, ecologically safe and non-hazardous damp proofing system.

Damp Cure is injected into mortar beds without the use of specialized high pressure equipment and is highly effective in the control of rising damp.

The damp proof course injection cream is typically dispensed through a nozzle using a caulking gun or hand-pump to deliver a rapid installation without smells or mess.

- Ecologically safe and non-hazardous
- No specialist equipment needed
- Fast, clean installation

Distinction

Damp Cure is specially formulated without non-active thickening agents to produce 100% effective and highly active DPC cream. The emulsified cream migrates rapidly into pores in the masonry to control capillary action and stop rising damp.

Damp Cure cream has been independently tested and accredited by the British Board of Agrément as being a 'fit for purpose' remedial damp proof course.

- Highly active DPC formulation
- 100% effective rising damp control
- BBA Approved - Certificate 13/5023

Product specification

Product: Damp Cure DPC

Material: Silicone emulsion cream

Packaging: 380ml cartridge

1000ml cartridge

3000ml tub

8000ml box

BBA Approval: Cert No 13/5023

BS6576: 1985 "Code of practice for installation of chemical damp-proof courses" requires all internal salt contaminated wall plaster to be replaced.

New plaster must not bridge the DPC and cavity walls should not be blocked. See the BBA certificate for a full plastering specification.

We Only Use No More Damp Plaster
